## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a process for post-crosslinking a polymer.

Group II, claim(s) 9-10, drawn to a water-absorbing polymer.

Group III, claim(s) 12, drawn to a hygiene article.

Group IV, claim(s) 13, drawn to a packaging material.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The common technical feature of the process of treating a polymer with a post-cross-linker according to formula I found in claim 1, post-cross-linking, and drying by heat is found in the prior art.

4. Engelhardt et al., U.S. Patent 6,414,214 teaches a process of post-cross-linking a water absorbent polymer by treating a cross-linked polymer derived from carboxylic acids or anhydrides with a 2-oxazolidinone derivative (column 3, lines 45-65; column 4, lines 45-67; column 8, lines 7-51). Goel et al., U.S. Patent 4,539,376 teaches using

Art Unit: 1796

bicyclic amide acetals, as recited by claim 1, to effect cross-linking on maleic anhydride polymers, and Goel teaches treating a polymer with the bicyclic amide acetal and drying afterwards at an elevated temperature (column 1, lines 13-68; column 3, line 41-column 4, line 5).

5. As a result, the common technical feature does not amount to a special technical feature, therefore inventions I-IV lack unity of invention.

6. A telephone call was made to JAMES NAPOLI on February 25, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
